

Yellow Field Pea

Plant Statistics

Key Attributes:

- Semi-leafless stand up plant
- Very strong standing pea
- High pod set
- Strong yield capability

Yield:

- 126% of Columbian
- 108% of Ariel
- (5 year average – 38 sites)

Growth Habit:

- Semi-leafless Stand up

Maturity:

- Mid-season – Ariel +1

Plant Height:

- Average Green Height = 27.3 inches
- Lodging Index = .94

Seed Type:

- Yellow Cotyledon
- 22.5 g/ 100 seed

Disease Resistance:

- Powdery mildew tolerance

Excellent Standing Ability all the way to Maturity

Carousel was bred by Svalof Weibull and brought to the PNW by ProGene Plant Research. Carousel is a yellow pea with very strong standing ability all the way to harvest. This standing ability plus its high pod set makes Carousel harvest friendly. Seed size is slightly larger than Universal. Maturity and plant height are similar to Ariel.

Yields of Carousel have been very competitive in trial comparisons and field performance has been excellent.

Quality of Carousel has been very good for Co-Ag who is the company handling and marketing the variety as a split and whole pea.
